

SEM Lab 3

February 4, 2009 – Topic Sequence

1. Ask about any questions from last lab?
2. Multiple linear regression
 - a. Modeling with more than two variables (w/ equation)
 - b. Regressing Math3 on Math1 and Math2 (including the correlation)
 - c. Noting differences in the LISREL syntax
 - d. Looking at output and path diagram

3. Reproducing variance / covariance matrix (see handout).
4. Questions? Comments?
